The KAPtery Picavet is available in three versions: a mostly ready-to-fly Picavet, the build-it-yourself Picavet Kit, and the Picavet Hardware without the 3D printed cross.

The following parts are included in the Picavet Kit, and all but the 3D printed cross are included in the [Picavet Hardware Kit](#).

3D printed parts: ([files at Thingiverse](#))

- Picavet cross

Firberglass shaft:

The shaft is fully assembled and drilled in the Picavet. Gluing and drilling are required with the Picavet Kit and Picavet Hardware Kit.

- 12 cm piece of solid fiberglass rod (5/16") OD
- 2.5 cm piece 2 mm steel rod
- 1 white vinyl cap

Attachment hardware:

- 2 stainless steel KAP'n Hooks
- 2 steel hairpin cotter pins
- 4 1¼" eye bolts, 6-32
- 4 6-32 nuts (Picavet Hardware Kit only)
- 30 feet of 50 pound braided Dacron line
- 1 nylon ring

The 3D printed Picavet cross and all the hardware required to make a self-leveling, damped suspension.
