Technical support: <http://kaptery.com/contact/>

The KAPtery Picavet is available in two versions: a mostly ready-to-fly Picavet, and the build-it-yourself Picavet Kit.

3D printed parts: ([files at Thingiverse](#))

- Picavet cross

Firberglass shaft:

The shaft is fully assembled in the Picavet. Gluing is required with the Picavet Kit.

- 12 cm piece of solid fiberglass rod (5/16") OD
- 2.5 cm piece 2 mm steel rod
- 1 white vinyl cap

Attachment hardware:

- 2 stainless steel KAPsnaps
- 2 steel hairpin cotter pins
- 4 1¼" eye bolts, 6-32
- 30 feet of 50 pound braided Dacron line
- 1 nylon ring

The 3D printed Picavet cross and all the hardware required to make a self-leveling, damped suspension.
